

BOARD OF HIGHWAY
AUGUST 12, 2015

Present: Mayor Louras, President Notte, Purchasing Agent Magro, Commissioner Wennberg, Engineer Rotundo and Project Manager Sears.

The Mayor called the meeting to order at 2:50 pm.

Mayor Louras stated GMP has expressed interest to him to place solar panels on city owned poles and arms (traffic signal lights) and asked that research be done and shown to him with an engineer stamp of approval before he agrees to allow the placement of the solar panels. Mayor Louras stated he has spoken to Brad Lafaso from LaFaso and GMP advised him that wind load is an issue. This was for information only and no action was taken.

Commissioner Wennberg stated the bid specifications for Dorr Drive are ready to go and there is an alternate in the bid. The base bid is the contractor would widen the road and the City's current vendor would reclaim and pave. The alternate bid is the contractor would widen the road, reclaim and pave. If neither is acceptable, the City would reject all widening, reclaim and pave with the existing width. Bids will be due August 26, 2015.

Project manager Sears stated that the "wave" on State Street had been dug up and will be reclaimed and paved by the end of the week. The work on Pine Street has also been started.

Mayor Loyras stated that if the Dorr Drive project was too much money, he would support road at same width as East Pittsford Road.

Meeting adjourned at 3:15pm.

Respectively submitted,
Sara Magro
